PROBLEM–SOLUTION FIT CANVAS

Team ID: UNM-293 2026-2430 **Project:** FitBuddy – AI Fitness Plan Generator using Gemini Models **Name:** Kaviya Sree.T

1. CUSTOMER SEGMENT(S) [CS] Students, beginners, busy young adults and general fitness users who need simple, personalized workout and wellness guidance.	***2. PROBLEMS / PAINS + ITS FREQUENCY [PR]*** Users struggle to create a suitable fitness routine, choose exercises, maintain consistency and adapt plans to their goals. These issues occur frequently, especially when starting or changing a routine.
3. TRIGGERS TO ACT [TR] Wanting to become more active, start a fitness routine, improve consistency, reach a personal fitness goal, or get a plan that fits available time and preferences.	***4. EMOTIONS BEFORE / AFTER [EM]*** Before: confused, unmotivated, uncertain and overwhelmed by many fitness choices. After: clearer, more confident, organized and motivated to follow a structured plan.
5. AVAILABLE SOLUTIONS – PROS & CONS [AS] Generic workout videos, websites, fitness apps and personal trainers. Pros: many exercises and resources are available. Cons: plans may be generic, difficult to personalize, costly, time-consuming or scattered across different sources.	***6. CUSTOMER LIMITATIONS [CL]*** Limited time, varying fitness experience, limited access to trainers or equipment, budget constraints, and difficulty finding a plan that matches personal goals and preferences.
7. BEHAVIOR + ITS INTENSITY [BE] Users search online for workouts, try fitness apps/videos and often change routines. Engagement can be high when the plan is simple and personalized, but consistency may drop when the routine feels difficult or unsuitable.	***8. CHANNELS OF BEHAVIOR [CH]*** Online: mobile/web fitness apps, search engines, social media and fitness videos. Offline: home workouts, gyms, sports/fitness activities and advice from friends or trainers.

9. PROBLEM ROOT / CAUSE [RC]	***10. YOUR SOLUTION [SL]***
Lack of personalized guidance, limited knowledge about exercise planning, difficulty matching routines to individual constraints, and lack of an easy system that converts user needs into a practical plan.	FitBuddy uses Gemini Models to generate personalized fitness plans from user inputs such as goals, preferences, available time and resources. It presents a structured, easy-to-follow plan intended to make fitness planning simpler, more accessible and personalized.

Maximum Marks: 5 Marks | Prepared according to the supplied Problem–Solution Fit Canvas template.
